Attention: Stanford Siu

Dear Sir:

Our File: RZ 03-23

**RE: ZONING AMENDMENT BYLAW NO. 3253**  
**20659-20679 EASTLEIGH CRESCENT**

Please be advised that Langley City Council gave Third Reading to the above-noted bylaw at the Regular Council Meeting held on September 25, 2023. The subject bylaw will be considered for adoption by City Council upon completion or resolution of the requirements set out below including the execution of a Development Servicing Agreement pursuant to Subdivision and Development Servicing Bylaw, 2021, No. 3126.

**1. Engineering Requirements**

**(PRELIMINARY ONLY)**

**Additional design changes may be required upon further investigation, site inspections and receipt of other supporting reports and documents.**

**All work to be done to the City of Langley's Design Criteria Manual (DCM), and the City's Subdivision and Development Servicing Bylaw (SDSB).**

**Per the City's DCM requirement, the developer and their consulting engineer shall submit to the City Engineer a signed and sealed copy of Form F-1 (Commitment by Owner and Consulting Engineer) prior to starting their design works.**

**Per the City's Watercourse Protection Bylaw No. 3152, the developer's consulting engineer shall submit to the City Engineer a signed and sealed copy of Form F-1 (Confirmation of Commitment by Qualified Environmental Professional - QEP) prior to starting their site monitoring works.**

These requirements have been issued to reflect the application for development for a proposed **171-unit apartment development located at 20659-20679 Eastleigh Crescent.**

*These requirements may be subject to change upon receipt of a development application.*

The City's Zoning Bylaw, 1996, #2100 has requirements concerning landscaping for buffer zonings, parking and loading areas, and garbage and recycling containers, all of which applies to this design.

**A) The Developer is responsible for the following work which shall be designed by a Professional Engineer:**

- I. A Qualified Environmental Professional (QEP) must be engaged to implement erosion and sediment control in accordance with the City of Langley Watercourse Protection Bylaw #3152, as amended.
- II. A storm water management plan for the site is required. Rainwater management measures used on site shall limit the release rate to pre-development levels to mitigate flooding and environmental impacts as detailed in the City's DCM. All calculations shall be based the City' DCM with 20% added to the calculated results to account for climate change. A safety factor of 20% shall be added to the calculated storage volume. Pre-development release rates shall not include climate change effect.
- III. All existing services shall be capped at the main by the City, at the Developer's expense prior to applying for a demolition permit.
- IV. New water, sanitary and storm sewer service connections are required. All pertinent pipe design calculations shall be submitted in spreadsheet format and shall include all formulas for review by the City. The Developer's engineer will determine the appropriate main tie-in locations and size the connections for the necessary capacity.
- V. The capacity of the existing water and sanitary sewer mains shall be assessed through hydraulic modeling performed by the City's hydraulic modeling consultant at the Developer's expense.

- a. Any upgrade requirement for either sanitary or water mains not covered under the City's DCC bylaw shall be designed and installed by the Developer at the Developer's expense.
  - b. At the Developer's expense, the City's hydraulic modeling consultant shall conduct a fire hydrant flow test to be used in the City's water modeling to determine if the existing water network is adequate for fire flows (based on architectural data supplied by the Developer's Architect). Upgrading of the existing watermain(s) may be necessary to achieve the necessary pressure and flows to conform to Fire Underwriters Survey (FUS) "Water Supply for a Public Fire Protection, a Guide to Recommended Practice, 1995."
- VI. Additional C71P fire hydrants may be required to meet bylaw and firefighting requirements. Hydrant locations must be approved by the City of Langley Fire Rescue Service.
- VII. New sidewalk, barrier curb, gutter will be required along the entire project frontage, complete with boulevard trees and a planting strip as per the City's DCM x-section SS-R07 and section 11.0 - Specifications and Standards for Landscaping. Transitions to existing sidewalks to be made using back-to-back long radius curves.
- VIII. A traffic impact assessment will be required as per the City's DCM.
- IX. The condition of the existing pavement along the proposed project's frontages shall be assessed by a geotechnical engineer. Pavements shall be adequate for an expected road life of 20 years under the expected traffic conditions for the class of road. Road construction and asphalt overlay designs shall be based on the analysis of the results of Benkelman Beam tests and test holes carried out on the existing road which is to be upgraded. If the pavement is inadequate, it shall be remediated at the Developer's expense.
- X. The site layout shall be designed by a civil engineer to ensure that the parking and access layout meets minimum design standards, including setbacks from property lines. Appropriate turning templates should be used to prove parking stalls and drive-aisles are accessible by the design vehicle.
- XI. Existing and proposed street lighting along the entire project frontage shall be reviewed by a qualified lighting consultant to ensure street lighting and lighting levels meet the City's DCM standards.
- XII. Eliminate the existing overhead BC Hydro/telecommunication infrastructure along the development project's Eastleigh Crescent frontage by replacing with underground infrastructure.
- XIII. A dedicated on-site loading zone shall be provided by the developer.

B) The Developer is required to deposit the following bonding and fees:

- I. The City will require a Security Deposit based on the estimated construction costs of installing civil works, as approved by the City Engineer.
- II. The City will require inspection and administration fees in accordance to the Subdivision Bylaw based on a percentage of the estimated construction costs, as per the City's Subdivision and Development Servicing Bylaw 2021 #3126.
- III. A deposit for a storm, sanitary and water services is required, which will be determined by City staff after detailed civil engineering drawings are submitted, sealed by a Professional Engineer.
- IV. The City will require a \$40,000 bond for the installation of a water meter to current City standards as per the DCM.
- V. A signed and sealed pavement cut form (Form F-2 of the City's DCM) shall be completed by the developer's consulting engineer. Upon the review and approval of the City Engineer of the submitted form, the corresponding Permanent pavement cut reinstatement and degradation fees shall be paid by the Developer.

NOTE: Deposits for utility services or connections are estimates only. The actual cost incurred for the work will be charged. The City will provide the developer with an estimate of connections costs, and the Developer will declare in writing that the estimate is acceptable.

C) The Developer is required to adhere to the following conditions:

- I. Unless otherwise specified by the City Engineer, all engineering works shall be designed based on the City's DCM specifications in accordance with the City's Subdivision and Development Servicing Bylaw 2021, No. 3126
- II. Undergrounding of hydro, telecommunication to the development site is required, complete with underground or at-grade transformer
- III. Transformers servicing developments are to be located on private property with maintenance access located on private property. All transformers to be wrapped upon installation by the Developer.
- IV. All survey costs and registration of documents with the Land Titles Office are the responsibility of the developer/owner. Please refer to the City's Subdivision and Development Servicing Bylaw 2021, No. 3126 for more details.

- V. A water meter is required to be installed on private property, preferably in the mechanical room, in accordance to the City's DCM standards at the Developer's cost.
- VI. An approved backflow prevention assembly must be installed on the domestic water connection immediately upon entering the building to provide premise isolation.
- VII. A Stormceptor or equivalent oil separator is required to treat site surface drainage.
- VIII. A complete set of record drawings (as-built) of off-site works, service record cards and a completed tangible capital asset form (TCA) all sealed by a Professional Engineer shall be submitted to the City within 60 days of the substantial completion date. Digital drawing files in .pdf and .dwg formats shall also be submitted. All the drawing submissions shall:
  - a. Use City's General Note Sheet and Title Block; and
  - b. Closely follow the format and sequence outlined in the City's DCM that will be provided to the Developer's Consulting Engineer.
- IX. The selection, location and spacing of street trees and landscaping are subject to the approval of the City Engineer. Please refer to the City's DCM for more details.
- X. Stormwater run-off generated on the site shall not impact adjacent properties, or roadways.
- XI. Garbage and recycling enclosures shall accommodate on the site and be designed to meet Metro Vancouver's "Technical Specifications for Recycling and Garbage Amenities in Multi-family and Commercial Developments - June 2015 Update." Please refer to the City's Subdivision and Development Servicing Bylaw 2021, No. 3126 for more details.

## **2. Other Requirements**

- A) The existing properties shall be consolidated and the approved subdivision plan shall be registered at the Land Title Office.
- B) Revised sealed architectural plans shall be provided with additional resident parking spaces provided in the underground parkade level, to provide a minimum total of 191 resident parking spaces.
- C) A Housing Agreement pursuant to Section 483 of the *Local Government Act* shall be registered against the title of the property to secure the tenure of the rental units in accordance with Policy 1.16.1 of the Official Community Plan.

If you have any questions concerning the engineering requirements, please contact Dan Krasevich, Engineering Technologist at ph. 604-514-2837. Thank you for your cooperation.

Yours truly,

A handwritten signature in black ink, appearing to read 'Anton', enclosed within a large, loopy oval stroke.
